Product Overview

Professional Abrasive Discs

These super-coated sanding discs are engineered for high-performance material removal and extended operational lifespan across various surfaces. Featuring a convenient Velcro backing, they allow for rapid disc changes, maximizing efficiency in professional workshops. The integrated dust extraction hole design ensures a cleaner workspace and prevents premature clogging during heavy-duty sanding tasks.

Technical Specifications

Diameter Options

- 100
- 115
- 125
- 150
- 180
- 225

Available Materials

Yellow Alundum, White Alundum, Black Silicon Carbide

Grit Range

40# - 1200#

Features

Key Benefits

Super-coated surface • Efficient dust extraction • Quick-change backing • Anti-clogging design

Backing Type

Hook and Loop (Velcro)
