

Super Silent Diesel Generator Set

This super silent diesel generator set provides reliable power generation. Its air-cooled diesel engine ensures efficient performance, while the soundproof canopy minimizes noise, making it suitable for noise-sensitive environments.

Product Overview

Reliable Silent Power Generation

This super silent diesel generator set is engineered for consistent performance in noise-sensitive environments. Featuring high-quality bearings and a patent-protected soundproof structure, it prevents common mechanical issues like excessive lube oil temperature and cooling fan failure. Its robust, air-cooled design ensures reliable operation for both standby and prime power applications.

Technical Specifications

Design Advantages

- Patent-protected silent canopy
- Advanced lube oil management
- Enhanced durability cooling fan
- Longer stroke engine (models DEK4500SL/DEK6000SL)

Cooling System	Air-cooled
Premium Components	NSK Bearings, NTN Bearings

Operational Features

Usage Scenarios

Emergency Power • Standby Power • Prime Power

Mobility	Yes
Control System	User-friendly integrated control panel
