

Super Silent Generator Canopy

The super silent generator canopy is engineered to minimize noise emissions from power-generating sets. These canopies incorporate advanced soundproofing and robust enclosures with ventilation for cooling.

Product Overview

High-Performance Power Generation

These professional-grade generator sets are engineered for reliable power delivery in diverse environments, ranging from industrial sites to noise-sensitive locations. Featuring advanced sound attenuation technology and robust weatherproof enclosures, they ensure consistent performance regardless of external conditions. The systems are highly customizable, supporting various operational modes and power requirements to provide a complete turnkey power solution.

Performance & Capacity

Power Output Range

9 kVA

Minimum Capacity

3450 kVA

Maximum Capacity

Supported Power Modes

- Standby (ESP)
- Prime (PRP)
- Base (COP)

Operating Frequencies

50Hz, 60Hz

Enclosure & Design

Enclosure Options

Soundproof • Weatherproof • Mobile • Trailer Mounted • ISO Container

Highly Customizable

Yes

Technical Specifications

Core System Components

Component Category	Description
Engine Type	Water-cooled diesel engines
Control System	Professional engine controllers
Alternator	High-efficiency industrial alternators

Operational Features

- Automatic mains fail operation
- Mains synchronizing
- Independent power supply
- Key start options
