Overview

Commercial Island Display Solution

The RG-15 Island Open Display Refrigerator is engineered for high-traffic retail environments, providing seamless access to perishable goods like meats, cheeses, and produce. Its robust design features a spacious open display layout with high-clarity visibility, ensuring products remain enticing to customers. Built with durable, corrosion-resistant materials and an automated temperature control system, this unit offers reliable performance and simplified maintenance for busy supermarket operations.

Construction & Design

Insulation Technology	Polyurethane integral foam for superior thermal efficiency and structural strength
Material Finish	Stainless steel construction on high-moisture components for enhanced corrosion resistance

Performance & Control

Temperature Regulation	Electronic automatic temperature controller
Compressor Protection	Yes

Compliance

Certifications	CE, ROHS, ISO
