

SureColor S80680 Wide-Format Inkjet Printer

The Epson SureColor S80680 is a high-performance wide-format solvent inkjet printer designed for producing vibrant and durable graphics. It features Epson's UltraChrome GS3 ink technology, delivering a wide color gamut and exceptional image quality.

Overview

Professional Wide-Format Printing

The SureColor S80680 is a high-performance wide-format solvent inkjet printer designed for demanding professional printing environments. Equipped with dual PrecisionCore TFP printheads and a 10-color ink configuration, it delivers exceptional print speeds and vibrant image quality. Engineered for reliability, it features advanced media handling, automated maintenance systems, and robust construction to minimize downtime and maximize productivity.

Performance

Print Speed

26.8 sqm/h

High-Speed Output

Print Resolution

720 x 720 dpi

Ink System

Ink Configuration

10-Color, CMYK, LC, LM, LK, Orange, Red, Silver/White Option

Ink Technology

UltraChrome GS3 RED Solvent Ink

Technology & Features

Printhead Technology

- Dual PrecisionCore TFP printheads
- 1-inch wide printhead array
- 360 nozzles per color column
- High-frequency jetting

Image Processing Technologies

- Color Lookup Table (LUT) technology
- VSDT (Variable Sized Droplet Technology)
- New Precision Dot Technology
- Advanced Micro-Weave technology

Reliability & Maintenance

Automated Maintenance

- Printhead protection device
- Advanced printhead cleaning system
- Air circulation system
- Ink agitation system

Media Handling Features

- Advanced tension control system
- Reinforced media supply system
- Precision paper feed control
- New rigid frame architecture

Certifications

Safety & Environmental Certifications

GREENGUARD Indoor Air Quality • French-VOC (A+)
