Product Overview

Professional Surface Finishing Screed

This surface finishing screed is a precision tool specifically designed for leveling and smoothing concrete surfaces in building sites and road construction projects. Engineered for efficiency, it features a robust engine and a vibration system that consolidates concrete to achieve optimal flatness. The design prioritizes operator comfort with adjustable handles and a lightweight blade, ensuring high performance and durability for professional concrete flooring applications.

Technical Specifications

Engine Type	Gasoline
Engine Stroke	4 stroke
Blade Material	Aluminum

Key Features

Operational Benefits

- Easy operation
- Simple transportation
- Ergonomic adjustable handles
- Vibration-assisted leveling

Ideal Applications	Concrete Slabs, Flooring, Pavements, Road Construction
