

Surface Mount Components on Carrier Tape

Surface mount components are arranged on a carrier tape for automated placement. The tape is designed for efficient handling in high-volume electronics manufacturing.

Product Overview

High-Efficiency Carrier Tape Packaging

This product features electronic components pre-loaded onto a high-quality carrier tape, designed specifically for seamless integration into high-volume manufacturing assembly lines. The continuous strip format facilitates smooth operation in automated pick-and-place equipment, minimizing downtime and increasing throughput. Engineered for precision, the carrier tape ensures components remain securely positioned during transport and assembly processes.

Technical Details

Design Features

- Continuous strip format
- Copper-colored carrier material
- Integrated sprocket holes
- Compatible with automated pick-and-place

Component Type	Resistors, Capacitors, Surface Mount
-----------------------	--------------------------------------

Assembly Specifications

Automation Suitability	Yes
-------------------------------	-----
