

Surface Mount CR2032 Battery Holder

This surface mount CR2032 battery holder ensures a reliable electrical connection. Its robust design features gold-plated contacts for excellent conductivity and corrosion resistance.

Product Overview

Reliable Surface Mount Battery Solution

This surface mount CR2032 battery holder is engineered for secure and consistent electrical connections in compact electronic designs. Featuring robust construction with high-quality materials, it ensures optimal conductivity and corrosion resistance for long-term reliability. It is an ideal choice for applications requiring a dependable power source, such as real-time clocks, memory backup systems, and various low-power devices, and is fully compatible with automated assembly processes.

Technical Specifications

Mounting Type

SMT

Model Number

BS-2032-6

Compatible Battery Series

CR2032

Materials and Construction

Metal Material

Phosphor bronze

Plastic Material

PPS

Application

Typical Applications

- Real-time clocks
- Memory backup
- Low-power devices
