

Surface Water Transfer Pump

This surface water pump is designed for efficient water transfer in various applications. It features a durable construction with a robust motor for reliable performance.

Product Overview

Efficient Surface Water Transfer

This surface water transfer pump is engineered for reliable performance across a variety of water management applications. Built with durable construction and a robust motor, it ensures consistent operation for both residential and agricultural needs. Its compact footprint and intuitive control interface make it a highly versatile and easy-to-deploy solution for fluid transfer.

Applications & Usage

Suitable Applications

- Agricultural Irrigation
- Domestic Water Supply
- General-purpose Water Transfer

Design & Construction

Design Highlights

Compact Design, Robust Motor, Durable Construction, Easy-to-use Controls
