Overview

Professional Aerial Access Solution

The ZLP series suspended access platform is an industry-standard aerial working tool engineered for safety and efficiency in high-altitude construction. Designed for versatility, this electric-powered cradle supports critical tasks such as building maintenance, painting, window cleaning, and structural repairs. With its modular architecture and rigorous safety systems, it offers reliable performance for complex project requirements at height.

Certifications & Standards

Quality Standards

ISO 9001, CE Certified

Technical Specifications

Included Components

- Suspension Mechanism
- Modular Work Platform
- Electric Hoists
- Safety Locks
- Electric Control Panel

Industry Experience

12 Years

Years of Manufacturing Expertise

Safety & Operation

Operational Advantages

- Simple operational interface
- High-precision controllability
- Modular design for site-specific customization
- Enhanced safety features including guardrails and emergency stops
