Product Overview

Professional Grade Pipe Wrench

The Swedish Type 90 Pipe Wrench is a heavy-duty tool engineered for high-performance gripping and turning in demanding industrial environments. Featuring a robust die-forged construction, it offers exceptional toughness and wear resistance, ensuring a long service life even under high-temperature conditions. Its ergonomic design and precise adjustability make it an essential solution for professional plumbing, construction, and general maintenance applications.

Technical Performance

Key Performance Attributes

- High-strength die forging process
- Superior wear resistance
- Advanced manufacturing precision
- High-temperature resistant components
- Ergonomic handle for labor-saving operation

Safety Certifications

Non-Sparking, Explosion-Proof
