

Sweeper Machine Wiper System

Complete wiper system designed for sweeper machinery. It includes a wiper motor, linkage, wiper arms, and wiper blade.

Product Overview

Heavy-Duty Sweeper Wiper System

This complete wiper system is engineered specifically for construction sweeper machinery, ensuring reliable visibility in demanding environments. The assembly features a high-performance wiper motor, precision linkage, durable wiper arms, and an effective wiper blade. Built for longevity, this system provides consistent motion and efficient water and debris removal from windshields.

Technical Composition

Included Components

- Heavy-duty wiper motor
- Wiper linkage system
- Durable wiper arms
- Wiper blade

Primary Application

Construction sweeper machinery

Performance Features

Key Features

Long service life, Heavy-duty construction, Reliable operation, Effective debris removal
