

# Swimming Pool Circulation Pump

This self-priming electric pump is designed for clean or slightly dirty water with suspended solids. It is suitable for swimming pool filtration systems.

## Product Overview

### High-Efficiency Circulation Pump

This robust centrifugal pump is engineered for reliable water circulation in swimming pools and spas. It features a durable thermoplastic housing that resists corrosion, ensuring long-term performance in demanding aquatic environments. Designed for quiet operation and energy efficiency, the unit includes a large-capacity clear strainer basket to effectively capture debris and maintain optimal flow.

## Motor Specifications

### Duty Cycle

Continuous Duty

### Motor Type

2-pole induction motor

## Electrical & Safety

### Protection Rating

IPX5

### Insulation Class

Class B

### Safety Features

Thermal Protection
