

Swimming Pool Heat Pump for Temperature Regulation

This heat pump is designed for swimming pool heating applications. It features a robust compressor, durable heat exchanger and user-friendly digital controls for efficient and reliable performance in maintaining desired pool temperatures.

Product Overview

High-Efficiency Temperature Regulation

This advanced swimming pool heat pump provides reliable and efficient temperature control for both residential and commercial pool applications. Engineered with a robust compressor and a durable heat exchanger, it ensures consistent performance throughout the seasons. The unit features an intuitive digital control interface, allowing for precise management of your pool's climate needs.

Technical Specifications

Connection Interface

- Water Inlet
- Water Outlet

Application Compatibility

Residential • Commercial

Certifications

RoHS
