

# Swing Check Valve DN40-400, WCB Material, Standard

This industrial swing check valve is designed to prevent backflow in pipelines. It is constructed from durable WCB material and complies with standards.

## Product Overview

### Industrial Swing Check Valve

This swing check valve is engineered for robust performance in industrial pipeline systems, effectively preventing backflow to maintain process integrity. Constructed from high-quality WCB material, it is designed for durability and long-term reliability in demanding environments. Adhering to strict standards, this valve provides a dependable solution for flow control across various industrial applications.

## Technical Specifications

Size Range (DN)	DN40 - DN400
Body Material	WCB
Standard Compliance	!"
