

Swing Check Valve for Industrial Applications

This swing check valve is designed for general chemical and industrial services. It complies with ANSI B 16.34 design standards and API 598 testing standards, making it suitable for use with water, oil, and gas.

Overview

Industrial Swing Check Valve

This swing check valve is engineered for reliable performance in demanding chemical and industrial environments. Designed to comply with ANSI B 16.34 standards and rigorously tested to API 598, it ensures safety and operational integrity. Suitable for water, oil, and gas applications, this valve offers versatile material options including CF8, CF8M, and CF3M to suit specific corrosive or high-pressure requirements.

Technical Specifications

Design & Testing Standards

- Design: ANSI B 16.34
- Testing: API 598

Body Materials	CF8, CF8M, CF3M
Applicable Media	Water, Oil, Gas

Dimensions

Size and Dimension Reference

Size	d (mm)	L (mm)
1/4"	11	65
3/8"	13	65
