

Switch Socket Plug Stamping Part

This metal stamping part is designed for use in switch socket plugs. It provides reliable electrical connectivity and mechanical stability within electrical assemblies.

Product Overview

Precision Stamping Parts

These high-precision stamping parts are specifically engineered for use in wall switches, sockets, circuit breakers, and relay components. Manufactured to tight tolerances, these parts ensure robust electrical connectivity and mechanical stability within power distribution assemblies. The components are built for durability, supporting a working life of 10,000 cycles for reliable long-term performance.

Technical Specifications

Voltage Rating	250 V
Working Life	10000 cycles
PIN Configuration	1-10
Material	Metal
Surface Treatment Options	Zinc plated, Nickel plated, Tin plated, Brass plated, Silver plated, Gold plated, Anodizing

Commercial Details

Minimum Order Quantity	10000
Warranty	1 year
Export Ports	Ningbo, Shanghai

Compliance

Certifications
ISO 9001-2015
