

Switzerland to IEC C15 Power Cord

This power cord connects devices with a C16 inlet to Swiss wall outlets. It features robust construction with VDE approved cable and molded connectors for enhanced durability and safety.

Product Overview

Professional Power Connectivity

This Switzerland 3-pin plug to IEC 60320 C15 power cord is designed to meet the rigorous SEV 1011 standards for safe, reliable energy transmission. Featuring a robust, molded connector design, it is an ideal solution for powering enterprise electronics, computers, and monitors in environments utilizing Swiss infrastructure. Built with high-quality, approved cable materials, this cord ensures safety and durability for professional applications.

Technical Specifications

Plug Standard	Switzerland SEV 1011 3-pin
Connector	IEC 60320 C15
Max Voltage	250 V

Compliance and Standards

Certifications	Swiss SEV, RoHS, REACH
