

Swivel Caster Wheel for Shopping Carts

This caster wheel is designed for shopping carts and similar applications. It features a durable construction with a grey polyurethane tread bonded to a polyolefin core, ensuring smooth and quiet rolling on various surfaces.

Product Overview

Professional Grade Mobility Solution

These swivel caster wheels are specifically engineered for high-frequency use in shopping carts and industrial logistics. Featuring a durable grey polyurethane tread bonded to a robust polyolefin core, they deliver quiet and smooth performance across diverse flooring surfaces. Designed for reliable maneuverability and secure attachment, these casters are an ideal choice for busy retail environments and warehouse operations.

Technical Specifications

Key Features

- Swivel design for enhanced maneuverability
- Durable bonded tread construction
- Quiet rolling performance
- Robust mounting plate for secure installation

Target Environments

Retail • Warehousing • Industrial

Material Composition

Polyurethane Tread, Polyolefin Core
