

Swivel Plate Caster with Brake

This swivel plate caster features a single brake and galvanized carbon steel bracket. It is suitable for use in furniture, toys, and instruments with a load capacity of less than 40kg.

Product Overview

Industrial Swivel Plate Caster

This heavy-duty swivel plate caster is designed for reliable mobility and stability in demanding environments. Featuring an integrated brake mechanism, it allows users to quickly lock and unlock the wheel to ensure equipment remains securely in place. Its robust steel construction and dual-wheel design provide excellent load distribution and smooth rolling performance, making it an ideal choice for carts, equipment stands, and various heavy-duty furniture.
