

Synthetic Webbing Sling for Heavy Lifting

These high-strength synthetic webbing slings are designed for lifting heavy loads. The slings are made from durable materials and feature reinforced eyes for secure attachment.

Overview

High-Performance Synthetic Webbing Slings

These high-strength synthetic webbing slings are engineered for secure and efficient heavy lifting across construction, manufacturing, and rigging applications. Constructed from durable, high-quality materials, they feature reinforced eyes for reliable attachment points. Their versatile design ensures safety and stability when handling demanding loads in professional environments.

Technical Specifications

Working Load Limit (WLL)

2000 KG

Working Load Limit

Material Type	High-strength synthetic webbing
Design Features	Reinforced Eyes, Heavy Duty, High-Strength

Applications

Recommended Industries

- Construction
- Manufacturing
- Rigging
