

T-Shaped Pipe Fitting

This T-shaped fitting connects three pipes or tubes, creating a perpendicular branch from the main line. It is suitable for diverting or combining fluid or gas.

Product Overview

Industrial T-Shaped Pipe Fitting

This durable T-shaped pipe fitting is engineered to facilitate secure connections between three pipe segments, enabling the diversion or combination of fluid and gas flows. Designed for industrial reliability, the fitting features a seamless construction with a matte finish, providing inherent corrosion resistance. It serves as an essential component for creating perpendicular branches in piping systems, ensuring long-term operational integrity.

Technical Specifications

Fitting Shape	T-Shaped
Finish	Matte, corrosion-resistant coating
Construction	Seamless
Connection Points	3
Suitable Media	Fluid, Gas
