

T-Style Industrial Blade 61.5x19x0.6mm

This T-style blade measures 61.5x19x0.6mm. It is made of SK2, SK4, and 60C material.

Product Overview

Industrial T-Style Precision Blade

The T-Style industrial blade is engineered for high-performance cutting applications, utilizing precision equipment imported from Germany to ensure superior edge quality. Available in various high-grade steel materials, these blades demonstrate exceptional durability and consistency, maintaining cutting integrity even after extensive use. This blade is designed for professional industrial environments requiring reliable, sharp, and wear-resistant cutting tools.

Product Specifications

Item Number	T-62
Dimensions	61.5 x 19 x 0.6 mm

Material Performance

Hardness and Sharpness Matrix

Material	Hardness	Sharpness (Force)
SK2	HRC65	d3N
SK4	HRC62	d4N
60C	HRC60	d5N

Available Materials	SK2, SK4, 60C
