Product Overview

High-Performance Automotive Lighting

The T10 COB LED bulb provides an energy-efficient, long-lasting alternative to traditional halogen automotive lights. Engineered with advanced Chip-on-Board technology, it delivers enhanced brightness while operating at a low temperature to minimize energy consumption. This versatile bulb is designed to support various car accessory lighting applications, offering a reliable, low-carbon upgrade for vehicle owners.

Technical Specifications

Installation Notes

- Polarity-sensitive design
- Reverse polarity (+/-) if light does not activate initially

Operating Voltage	12 V
Lighting Technology	COB (Chip-on-Board)
Environmental Impact	Low-Carbon, Reduced CO2, Low Temperature Operation
Country of Origin	China
