Product Overview

High-Performance T20 7440 LED Bulb

The T20 7440 LED bulb features 15 high-output SMD LEDs designed for superior brightness and reliable automotive lighting. Engineered for versatility, it supports a wide voltage range of 9-32V and is compatible with both CK and non-CK sockets. Its non-polarity, plug-and-play design ensures easy installation for applications such as brake, reverse, and turn signal lights.

Technical Specifications

Available Colors

- Red
- White
- Amber

Voltage Range	9-32V DC
Power Consumption	7.5 W
Luminous Output	440 LM
Socket Types	T20, 7440, W3x16D, W21W

Compliance & Features

Certifications

E-MARK • CE

Warranty: 3 Years

Product Features: Non-Polarity, CK Compatible, Constant Current, Patented Design
