

T3-G5 Linear Lighting Fixture

The T3-G5 linear lighting fixture is designed for efficient light distribution and energy savings in commercial and residential settings. Its durable construction ensures longevity and reliable performance.

Product Overview

Professional Linear Lighting Solution

The T3-G5 Linear Lighting Fixture is a high-efficiency illumination device engineered for versatility in residential and commercial environments. This model is designed to provide superior energy savings and environmental protection compared to traditional T4 and T5 predecessors. Its durable construction ensures longevity and consistent, flicker-free performance for optimal visual comfort.

Key Advantages

Performance Benefits

Energy-Saving, Low-Carbon, Cost-Effective, Eco-Friendly

Technical Specifications

Design Features

- Slim profile
- Durable material construction
- Efficient light distribution
- Seamless architectural integration

Installation Compatibility

Compatible with standard electrical systems for easy installation.
