

T80 LED Bulb

The T80 LED bulb is designed for energy-efficient and long-lasting illumination. It features optimized heat dissipation, ensuring a bright, uniform light output suitable for various indoor applications.

Product Overview

High-Performance T80 LED Bulb

This high-performance T80 LED bulb is engineered for energy-efficient and long-lasting illumination across diverse environments. Featuring robust construction with optimized heat dissipation, it ensures an extended operational lifespan while delivering bright, uniform light output. Designed for versatility, it is compatible with standard E26/E27 sockets for seamless installation in residential, commercial, and industrial settings.

Technical Specifications

Socket Compatibility	E26/E27
Shape	T80

Key Features

Performance Highlights

1 Status

Instant-On

Operational Benefits	Energy Efficient, Flicker-Free, Long Lifespan, Optimized Heat Dissipation
----------------------	---------------------------------------------------------------------------

Applications

Suitable Environments

- Residential Lighting
- Commercial Lighting
- Industrial Lighting
