

Tablet Vertical Form Fill and Seal Machine

This vertical form fill and seal (VFFS) machine is designed for packaging tablets and similar granular products. It features automated filling and sealing mechanisms, stainless steel construction, and a control panel for parameter adjustments.

Product Overview

High-Efficiency Tablet Packaging Solution

This Vertical Form Fill and Seal (VFFS) machine is engineered for the high-volume packaging of tablets and granular products. Built with durable stainless steel, the system integrates automated filling and sealing mechanisms to ensure consistent output. It is an ideal solution for pharmaceutical and food industry production lines requiring precision and reliability.

Technical Specifications

Equipment Type

VFFS • Automated

Machine Capabilities

- Automated filling mechanism
- Precision sealing system
- Integrated control panel
- Parameter adjustment interface

Material

Stainless Steel

Target Industries

Pharmaceutical, Food Industry
