

Tabletop Air Circulation and Exhaust Fan

This compact fan is designed for household use, providing localized air circulation. The fan's design allows for both cooling and air extraction purposes.

Product Overview

Compact Air Circulation and Ventilation Solution

This versatile tabletop unit functions as both an air circulator and an exhaust fan, providing efficient airflow management for small to medium-sized spaces. Designed with a compact, square frame and a stable base stand, it is ideal for localized cooling or ventilation needs. The integrated vertical grill design ensures user safety while maintaining optimal performance for household or light commercial environments.

Design & Build

Form Factor	Tabletop
Frame Style	Square frame
Safety Features	Vertical grill bars, Stable base stand

Usage & Application

Primary Functions

- Air circulation
- Air extraction/ventilation

Recommended Environment

Small rooms • Medium-sized rooms • Household use
