

Tabletop Air Circulator Fan with Adjustable Head

This air circulator fan is designed to provide powerful airflow and circulation. It features adjustable speed settings, a directional fan head, timer function, and swing mode for optimal air circulation.

Product Overview

Compact Air Circulation Solution

The HTS-F118B Air Circulator is designed to deliver powerful, consistent airflow in a compact form factor. Featuring an adjustable head and multi-speed settings, it allows for precise control over air intensity and direction, making it ideal for tabletop or floor placement. With built-in features like a timer and swing mode, this unit ensures efficient air mixing and distribution for improved comfort in any space.
