

Tandem CNC Press Brake for Long Workpieces

This tandem CNC press brake is designed for precision metal forming. The machine combines two press brakes to handle extra-long workpieces or increase production capacity.

Product Overview

Versatile Tandem CNC Bending Solution

The 2-PPEB1800/80 Tandem CNC Press Brake is a specialized solution designed for the precision forming of extra-long metal workpieces. Engineered for flexibility, it enables both single-stroke simple bending and multi-stroke complex forming to meet diverse production requirements. This equipment is an essential asset for industries including shipbuilding, automotive, aerospace, and heavy machinery manufacturing.

Technical Specifications

Model Designation	2-PPEB1800/80
Bending Capability	Single-stroke bending, Complex multi-stroke forming

Industry Applications

Industry Usage

- Heavy Machinery
- Light Engineering
- Agriculture
- Shipbuilding
- Automotive
- Aircraft

Key Features

Operational Highlights

1800 T

Tandem Capacity Class

80 ref
