Product Overview

Industrial Tank Container

This industrial tank container is precision-engineered for the secure transport and storage of various liquid and gaseous materials. Built with a robust, high-visibility red structural frame, it provides superior protection during complex logistics operations. The unit features an integrated insulated tank design, making it highly effective for maintaining necessary temperature controls for sensitive industrial, chemical, or petrochemical cargo.

Technical Features

Control System

- Integrated valve cabinet
- Pressure monitoring gauges
- Level instrumentation
- Controlled filling and dispensing system

Suitable Industries

Chemical, Petrochemical, Industrial Logistics

Structural Specifications

Frame Construction

Reinforced structural frame

Insulated Tank

Yes

Compliance

Industry Certifications

International Shipping Standards
