

Tanker Trailer for Liquid Transport

This tanker trailer is designed for transporting liquids or gases. It features a cylindrical tank with reinforcing ribs, mounted on a multi-axle chassis.

Product Overview

Professional Liquid Transport Solution

This heavy-duty tanker trailer is engineered for the efficient and secure transport of various liquids or gases. Featuring a robust cylindrical tank design with reinforcing ribs and a multi-axle chassis, it provides the necessary durability for long-haul industrial applications. The unit includes essential operational features such as landing gear for stable detachment and an integrated ladder system for safe access to the tank top.

Technical Specifications

Tank Configuration	Cylindrical with reinforcing ribs
Chassis Type	Multi-axle
Application	Liquid Transport, Gas Transport, Heavy-duty

Operational Features

Access Equipment

- Integrated ladder for top access
- Landing gear for detached support

Safety Markings

Orange identification stripe
