

Tanker Truck for Bulk Material Transport

This tanker truck is designed for the transportation of bulk materials. It features a cylindrical tank mounted on a truck chassis, equipped with pipes and fittings for loading and unloading.

Overview

Industrial Bulk Transport Solution

This specialized tanker truck is engineered for the efficient transport of bulk dry materials, such as cement. Designed with a high-capacity cylindrical metallic tank, it features integrated piping and fitting systems to facilitate streamlined loading and unloading processes. Its robust construction ensures reliable performance for demanding industrial logistics applications.

Technical Specifications

Tank Application	Bulk Dry Material (Cement)
Construction Material	Reinforced Metal
Unit Identification	00331335
Reference ID	541-4929-31

Features

Core Features	Bulk Cement Transport, Integrated Piping, High-Capacity Tank, Industrial Grade
