

Tankless Gas Water Heater for Indoor Use

This tankless gas water heater is designed for indoor installation. It provides hot water on demand with precise temperature control and energy-saving features.

Overview

High-Efficiency Indoor Heating

This indoor tankless gas water heater is engineered for on-demand performance, providing an endless supply of hot water whenever you need it. Designed with a compact footprint to save space, it features computerized safety systems and precise temperature control. It is an energy-efficient solution ideal for professional applications requiring reliable, continuous water heating.

Performance

BTU Capacity Options	145,000 BTU, 170,000 BTU
Temperature Control	Yes

Features

Key Features

- Endless Hot Water
- On-Demand Usage
- Precise Temperature Control
- Energy Saving Design
- Computerized Safety Systems
- Compact, Space-Saving Footprint

Interface

Digital Interface

Touch-Sensitive Controls • Temperature Readout (°F)
