Product Overview

High-Efficiency Instant Hot Water Solution

This tankless natural gas water heater provides a continuous and on-demand supply of hot water, eliminating the need for bulky storage tanks. Designed for residential efficiency, it features a constant temperature strong exhaust system to ensure safe and reliable operation. With multiple capacity options and a compact design, it is an ideal choice for modern homes seeking energy-efficient water heating.

Performance Metrics

Performance Highlights

12 L/min

Max Capacity

24 kW

Max Heat Input

2

Energy Level

Technical Specifications

Available Capacities

Hot Water Capacity (t=25)	Rated Heat Input	Dimensions (mm)
6L/min	12kW	485 x 300 x 165
9L/min	18kW	595 x 330 x 205
12L/min	24kW	655 x 350 x 205

Operational Requirements

Gas Type & Pressure

- Natural Gas (NG): 2000 Pa
- Liquefied Petroleum Gas (LPG): 2800 Pa

Operating Water Pressure

0.02 ~ 0.8 MPa

Safety & Design

Efficiency Standard

Level 2 Energy Efficiency

Exhaust System

Constant temperature strong exhaust type

Key Features

Tankless, Instant Heating, Digital Display, Gas Control Knob, Constant Temperature
