

Taper Shank Twist Drill Bit

These taper shank twist drill bits are made from high-speed steel. They are manufactured to meet DIN341 and GB1439 standards.

Product Overview

Taper Shank Twist Drill Bit

These taper shank twist drill bits are manufactured according to DIN341 and GB1439 standards, ensuring reliable performance in industrial drilling applications. Designed with a Morse taper shank, they provide excellent stability and torque transmission when used in drill presses and machine tools. This series covers a wide range of diameters and lengths, making it suitable for diverse metalworking and machining requirements.

Standards & Compliance

Standards	DIN341, GB1439
