Product Overview

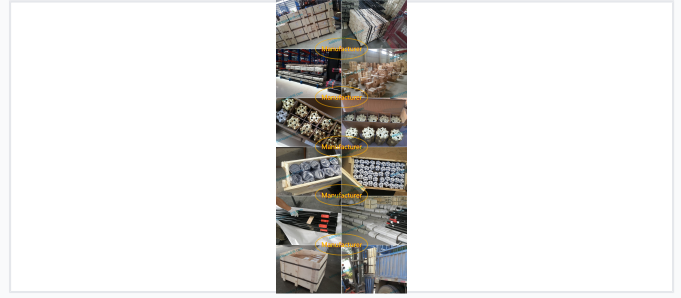

High-Performance Tapered Button Bits

These high-quality tapered button drill bits are engineered for demanding rock drilling environments, including dimensional stone quarrying, mining, and construction projects. Constructed with premium raw materials and specialized heat treatment, they offer superior durability and efficient rock fragmentation. The versatile design supports various drilling equipment, making them an ideal choice for short-hole drilling and roof bolting applications.

Technical Specifications

Detailed view of the drill bit face, featuring front and gauge water holes for efficient cooling and dust removal during operation.

High-performance tapered button bits designed for reliable performance in mining and construction drilling applications.

Diameter Range

- 30mm
- 32mm
- 34mm
- 42mm

Taper Degrees

- 4°
- 6°
- 7°
- 11°
- 12°

Shank Hex Sizes

- 19mm
- 22mm
- 25mm

Button Count	7 buttons
