

Tapered Roller Bearing

Tapered roller bearings are designed to handle both radial and axial loads in demanding applications. Their tapered rollers and raceways ensure efficient load distribution and smooth operation.

Product Overview

High-Performance Tapered Roller Bearings

These tapered roller bearings are engineered to support combined loads, primarily consisting of radial loads alongside axial loads. Featuring a separable cup design, they allow for easy mounting, dismounting, and maintenance. Built for durability, these bearings offer high-speed capability, low noise, and a long service life, making them ideal for demanding automotive and industrial machinery applications.

Technical Specifications

Dimensions

100 mm

Inner Diameter (d)

150 mm

Outer Diameter (D)

39 mm

Width (B)

Weight

2.33 kgs

Materials

Gcr15, Gcr13

Quality and Standards

Certifications

ISO9001-2000

Performance Features

- Low noise
- High speed performance
- Long operating life
- High load capacity

Availability

Available Series

- 30000 Series
- 31000 Series
- 32000 Series
- 33000 Series
- 35000 Series
- Inch Series
