

Tapered Roller Bearing

This is a high-precision rolling bearing designed for heavy-duty applications. It features tapered rollers for optimal load distribution and reduced friction and is manufactured with high-quality steel for durability and long service life.

Product Overview

High-Precision Tapered Roller Bearing

This high-precision rolling bearing is engineered for demanding heavy-duty industrial applications. Utilizing a tapered roller design, it ensures optimal load distribution and significantly reduced friction during operation. It is an ideal solution for integration into axles, gearboxes, and various high-performance rotating machinery components.

Technical Specifications

Suitable Applications

- Axles
- Gearboxes
- Rotating Machinery

Material Composition

High-quality steel

Key Features

High-Precision, Tapered Roller Design, Heavy-Duty, Low Friction
