Product Overview

High-Performance Tapered Roller Bearing

This inch-size tapered roller bearing is engineered for demanding industrial and automotive applications, offering exceptional durability and load-handling capabilities. Featuring a single inner ring design, it is built to manage both radial and axial loads efficiently, ensuring smooth operation in gearboxes and reducers. Manufactured to strict international standards, this component is designed for high reliability and long service life in heavy-duty machinery.

Physical Dimensions

Bore Diameter	57.15 mm
Outer Diameter	96.838 mm
Width	21.946 mm
Weight	0.58 KGS/SET

Technical Details

Bearing Type	Inch size tapered roller bearing
Load Handling	Radial Load, Axial Load

Compatibility & Standards

Compatibility	Yes
Standards Compliance	International manufacturing standards
