

Tapered Shank Twist Drill Bit

High-speed steel twist drill bit features a tapered shank. The spiral flute design ensures efficient chip evacuation during drilling.

Product Overview

High-Performance Tapered Shank Twist Drill

This high-speed steel twist drill bit is engineered for professional applications requiring precise and clean hole drilling across various materials. Its specialized spiral flute design ensures efficient chip evacuation, preventing clogging and heat buildup during intensive use. Built for durability, this tool is compatible with both stationary machine tools and portable drilling equipment, offering versatile performance for industrial sourcing needs.

Technical Features

Material

High-Speed Steel (HSS)

Shank Design

Tapered Shank

Flute Geometry

Spiral flute for efficient chip evacuation

Application

Compatible Equipment

- Machine tools
- Portable drilling equipment

Core Advantages

Precise Drilling, Clean Holes, Extended Tool Life, Efficient Chip Removal
