

TC SC Oil Seal for Industrial and Automotive Applications

This oil seal is engineered for effective sealing in diverse applications. It is constructed from durable materials, offering resistance to wear, high temperatures, and chemical degradation.

Product Overview

Professional Sealing Solution

The TC SC Oil Seal is designed to provide a robust barrier against oil leakage in demanding industrial and agricultural environments. Engineered for versatility, these seals are compatible with a wide range of machinery, including wheel tractors and various power equipment. They are available in multiple high-performance material compositions to meet specific operational requirements for wear resistance and chemical durability.

Material & Compatibility

Available Materials

NBR, SILICONE, FKM, ACM

Application Specifications

Primary Applications

- Agricultural Machinery
- Industrial Equipment
- Wheel Tractors
- General Power Machinery

Standardization

Seal Design

TC • SC

Size Availability

Extensive inventory of thousands of tool sizes available to meet diverse industrial requirements.
