

TC5516 Stationary Tower Crane with 6-Ton Capacity

The TC5516 construction tower crane is engineered for efficient lifting operations at construction sites. It has a maximum load capacity of 6 tons and a jib length of 55 meters.

Overview

High-Performance Construction Crane

The TC5516 stationary tower crane is engineered for demanding construction environments, offering a maximum lifting capacity of 6 tons. With a 55-meter jib length and advanced hoist, slewing, and trolley mechanisms, this unit ensures smooth, stable, and safe operation. Built with high-quality steel, it is designed for long-term durability and reliability on high-rise projects.
