Product Overview

High-Precision Cutting Solution

This premium Tungsten Carbide Tipped (TCT) circular saw blade is engineered for professional-grade precision in woodworking and construction projects. Utilizing advanced Alternate Top Bevel (ATB) tooth geometry, it ensures exceptionally clean, efficient, and smooth cuts across various materials. Built for durability and performance, this blade is an essential tool for demanding cutting applications.

Technical Specifications

Maximum Speed

6600 r/min

Max Rotation Speed

80 m/s

Max Circumferential Speed

Blade Diameter

230 mm

Tooth Configuration

ATB (Alternate Top Bevel)

Compliance and Quality

Reference Codes

- EPA 90304
- EPA 90305

Quality Certifications

ISO 9001, ISO 14001
