

# TCT Circular Saw Blade with TCG and Flat Teeth

This high-performance TCT circular saw blade is designed with a combination of TCG and flat teeth. It is ideal for use with electric tools, ensuring clean and precise cuts on a variety of materials.

## Product Overview

### High-Performance Cutting Precision

This circular saw blade is engineered with a specialized combination of Triple Chip Grind (TCG) and flat teeth to deliver clean, precise cuts across a wide range of materials. Constructed for durability, the tungsten carbide tipped (TCT) design ensures consistent performance and efficient material removal. The blade geometry is optimized to reduce operational vibration and noise, making it an excellent choice for professional-grade power tools.

## Technical Specifications

Diameter	230 mm
Maximum Rotation Speed	5500 r.p.m
Maximum Cutting Speed	80 m/s

## Compliance and Quality

### MPA Identification

- MPA 90501
- MPA 90505

Certifications	ISO 9001, ISO 14001
