Product Overview

Professional TCT Circular Saw Blades

These professional-grade Tungsten Carbide Tipped (TCT) circular saw blades are engineered for high-precision cutting across various materials. Featuring a Triple Chip Grind (TCG) tooth configuration, they deliver clean, efficient cuts while maintaining durability under load. Designed for industrial performance, these blades meet high-speed operating standards to ensure productivity in demanding workshop environments.

Technical Specifications

Application Compatibility

- Multi-material (10 inch model)
- Aluminum (12 inch model)

Tooth Type

TCG (Triple Chip Grind)

Available Diameters

10 inch (254mm), 12 inch (300mm)

Performance Metrics

Operating Limits

6000 RPM

Max Speed (10 inch)

3800 RPM

Max Speed (12 inch)

60 m/s

Max Velocity

Ordering Information

Reference Table

Diameter	Model Ref	Bore Size
10 inch	CTTSP0013A	1 inch (25.4mm)
12 inch	CTTSP0037	1-1/5 inch (30mm)
