

TD-SCDMA Wireless Data Card

This TD-SCDMA data card provides high-speed wireless connectivity. It features seamless automatic switching between 3G and 2G networks.

Overview

High-Performance Wireless Connectivity

The HNC601 TD-SCDMA Wireless Data Card is a compact, high-speed solution designed for reliable mobile internet access. Featuring seamless automatic switching between 3G and 2G networks, this device ensures consistent connectivity for professional users. Its plug-and-play design includes automatic installation, making it an efficient tool for modern communication needs.

Technical Specifications

Hardware Platform	T3G 7210
Software Version	TDV201R2
Interface Type	USB
SIM/USIM Interface	Drawer deck
Antenna	Internal

Performance Metrics

TD-SCDMA Capability

2.8 Mbps

Download Speed

384 Kbps

Upload Speed

Network Switching

Seamless Automatic Switching • 3G-2G Compatible

Physical Dimensions

Dimensions (L x W x H)	92 x 28 x 13.5 mm
------------------------	-------------------

Operating Frequency

Frequency Bands

Standard	Frequency Range
GSM900	880-915MHz / 925-960MHz
GSM1800	1710-1785MHz / 1805-1880MHz
TD-SCDMA	2010-2025MHz / 1880-1920MHz

Features

Installation	Autorun PC client
Indicators	Intelligence indicates working status
