

Tea Vacuum Packaging Machine

The tea vacuum packaging machine efficiently packages tea leaves under vacuum. It ensures freshness and longevity by removing air and sealing the contents in airtight packaging.

Overview

Precision Tea Packaging Solution

The ZF-300 Tea Vacuum Packaging Machine is a specialized solution designed for the efficient preservation of tea leaves. By removing air and creating an airtight seal, this machine significantly extends the freshness and shelf life of tea products. It offers adjustable settings for vacuum intensity and sealing time, ensuring versatility for various tea types and packaging quantities.

Technical Specifications

Model	ZF-300
Primary Application	Tea Packaging, Vacuum Sealing, Food Preservation

Performance Features

Key Performance Indicators

300 Series

Model Designation

Adjustable Parameters

- Vacuum Intensity
- Sealing Time
