

Technical Specification Machine Tools

These machine tools come with varied technical specifications. The specifications detail dimensions, processing capabilities, power, and structural parameters.

Overview

High-Performance Machine Tools

These professional-grade machine tools are engineered for heavy-duty industrial processing, offering a wide range of capabilities to suit diverse manufacturing requirements. With robust motor power options up to 37kW and maximum processing weights reaching 26,000kg, these machines provide the stability and force needed for precise, demanding operations. The series features versatile workbench dimensions and advanced speed controls, ensuring flexibility for various workpiece sizes and material handling needs.

Performance Metrics

Motor Power Range

22 kW Minimum Power	37 kW Maximum Power
-------------------------------	-------------------------------

Max Processing Weight

10000 kg Min Capacity	26000 kg Max Capacity
---------------------------------	---------------------------------

Technical Specifications

Permissible Rack Pull	51000 N
Stroke Speed	0.03-40 m/min (Stepless)
Beam Lifting Speed	0.2-12 mm/min (Stepless)

Models & Dimensions

Model Specifications Comparison

Model	Max Processing L (mm)	Max Processing W (mm)	Max Weight (kg)	Motor (kW)
BXMQ 2016B-2	4000	1600	10000	22(SRD)
BXMQ 2016E-2	6000	1600	15000	30(SRD)
BXMQ 2018D-2	6000	1800	15000	30(SRD)
BXMQ 2018E-2	8000	1800	18000	30(SRD)
BXMQ 2020F-1	4000	2000	12000	22(SRD)
BXMQ 2020E-1	8000	2000	18000	30(SRD)
BXMQ 2020H-1	12000	2000	26000	37(SRD)
